

TEACHING PORTFOLIO

Zipeng (Cooper) Guo

Ph.D. Candidate, Urban and Regional Sciences
Department of Landscape Architecture and Urban Planning
Texas A&M University

2026–2027

Cover: photo montage made from studio field trips to McGovern Centennial Gardens and the Hermann Park children's garden, Houston, TX, and from student work (plans, sketches, and a study model).

PROFILE

Zipeng (Cooper) Guo

I am a Ph.D. candidate in Urban and Regional Sciences at Texas A&M University, with a Master of Landscape Architecture (2022) and a B.S. in Landscape Architecture (2020) from the University of Idaho. My research uses smartphone mobility data to study park attractiveness: what draws people to urban parks and how design shapes those visits. I bring that evidence into design studios and into community projects that students help carry from concept to construction.

TEACHING AREAS

Landscape design studio · Site planning and feasibility · GIS and geodesign · Digital representation · Park and recreation planning

EDUCATION

- Ph.D., Urban and Regional Sciences, Texas A&M University, 2023–present (expected Spring 2027)
- Master of Landscape Architecture, University of Idaho, 2022
- B.S., Landscape Architecture, University of Idaho, 2020

TEACHING APPOINTMENTS

- Co-instructor, LAND 212 Landscape Design II, Texas A&M, 2024–2026
- Co-instructor, LAND 601 MLA studio, Texas A&M, 2025
- Teaching assistant, LAND 601 MLA studio, Texas A&M, 2023–2024
- Teaching assistant, URPN 220 Digital Communication I, Texas A&M, 2023
- Co-instructor, LARC 380 Water Conservation Technologies, University of Idaho, 2022
- Co-instructor, LARC 210 Representation and Media, University of Idaho, 2021

New course ideas

LANDSCAPE COST AND LIFECYCLE PLANNING

Upper-level BLA and MLA. Students price a park through building, upkeep, and renewal with Texas cost data, then present the budget to a real town.

PARK DATA LAB

Graduate seminar. Students use GIS, LiDAR, and smartphone mobility data to see how people use parks, and turn the findings into design guidelines.

TEACHING RECORD

Teaching Record

HOW I TEACH

I teach landscape architecture as a way to read how people actually use places and to design for that use. Students start from evidence (site observation, GIS analysis, and data on how people move through parks and campuses) and learn to turn it into form, space, and program.

Whenever I can, studios work with real places and real clients. Students present to community partners, revise in response, and think about how a design will be built, maintained, and renovated, not only how it looks on a board. Digital tools, from GIS and LiDAR to mobility data and AI, come in as ways to test ideas, and students learn to check what the tools produce against what they see on site.

Mentoring continues after the semester. I invite interested students to carry studio projects into summer internships with community partners, where several designs have moved toward funding and construction.

STUDENT EVALUATIONS

What Students Say

FALL 2023 – SPRING 2026 · SIX TERMS — Texas A&M end-of-term Student Course Evaluations

RATED “WELL PREPARED FOR EACH CLASS” · MEAN ON A 1–5 SCALE (5 = STRONGLY AGREE)

WHAT STUDENTS WROTE

> *It felt like he was teaching at a professional level, I feel he would be a great professor one day.*
>
> — Student, LAND 212, Spring 2025

> *[He] would go out of his way to provide resources for us. … You could tell he was truly passionate about his teaching, and he went out of his way to check in with us and make sure we were not only doing well in the class, but also taking care [of] ourselves.*
>
> — Student, LAND 212, Spring 2026

> *He gave very helpful feedback, and really encourage[d] growth in a polite manner.*
>
> — Student, LAND 212, Spring 2025

> *Pretty qualified and passionate. Loves when we ask questions. Humble in his responses.*
>
> — Student, LAND 212, Spring 2025

Source: Texas A&M end-of-term Student Course Evaluations, item rating Zipeng Guo. LAND 212 Spring 2024 and Spring 2025 combine sections 501 and 502, weighted by responses; Spring 2026 and Fall 2025 were exported while the surveys were still open. Quotes are verbatim; brackets mark small edits for grammar, and the ellipsis marks omitted text.

01 LANDSCAPE DESIGN STUDIO · GRADUATE · MLA

LAND 601 · Fall 2023 · Teaching assistant

Campus Landscape Design, 2023–2025

SITE: ARCHITECTURE QUAD, TEXAS A&M · EVERY FALL

A required project with a new focus each year

Fall 2023 · Final presentation day

Fall 2024 · Pinup

Fall 2024 · Final review with study models

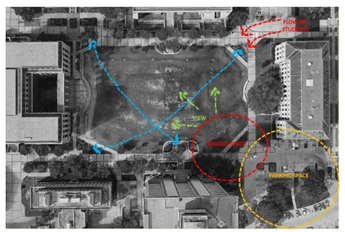

Photos with students are used with their permission, which they gave before the photos were taken.

Every fall, LAND 601 students take on a campus landscape design project. The site is the Architecture Quad, the 1.86-acre lawn framed by the Langford Architecture Center, Liberal Arts, Oceanography and Meteorology, and the historic Administration Building. The site stays the same; the focus changes each year, so the project grows with the studio. In 2025 it moved from the last project to the first, so its analysis methods could carry into the later projects.

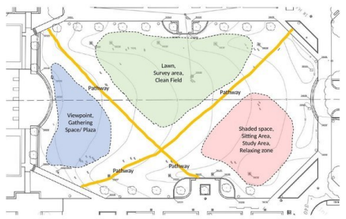

2023 · DESIGN PROCESS AND MODELING

Final project · one project, start to finish

Bubble diagrams and form studies lead to hand-rendered plans and working models.

1 Site analysis

2 Bubble diagram

3 Form studies

4 Master plan

5 Rendering

6 Final review with guest jurors, Dec 6, 2023

A required project with a new focus each year

MLA STUDIO

2023 · FINAL BOARDS

Final project · Dec 5–6, 2023

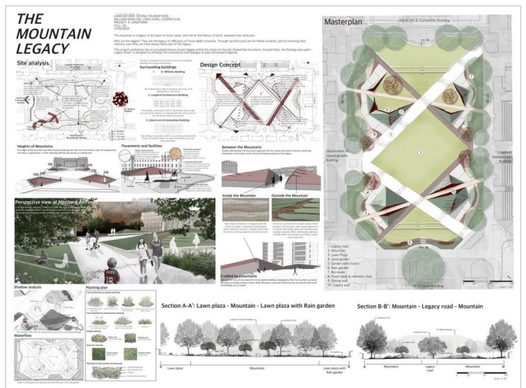

2024 · LANDFORM AND GRADING

Final project · Nov 25, 2024

The slope becomes the material: mounds, swales, grading plans, sections, and clay models.

MLA STUDIO

01 LANDSCAPE DESIGN STUDIO · GRADUATE · MLA

LAND 601 · Fall 2025 · Co-instructor

Campus Landscape Design, 2023–2025

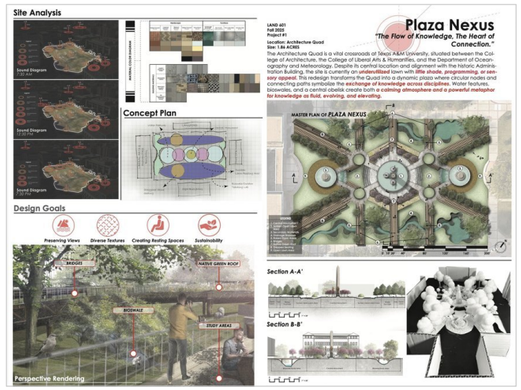

FALL 2025 · ARCHITECTURE QUAD AND EASTGATE PARK

Projects 1 and 2 · individual

2025 · DEEPER SITE ANALYSIS

First project · Architecture Quad · Aug 25 – Sep 26, 2025

Sun, shade, wind, and sound studies set the concept, with more digital modeling.

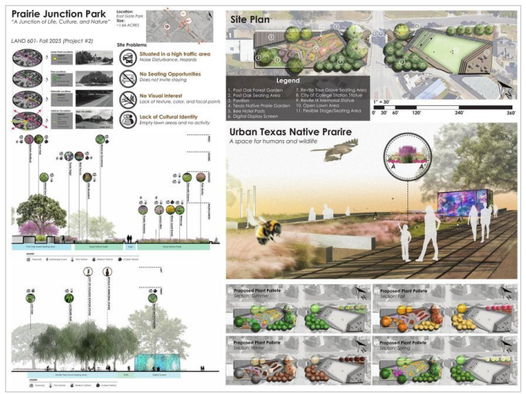

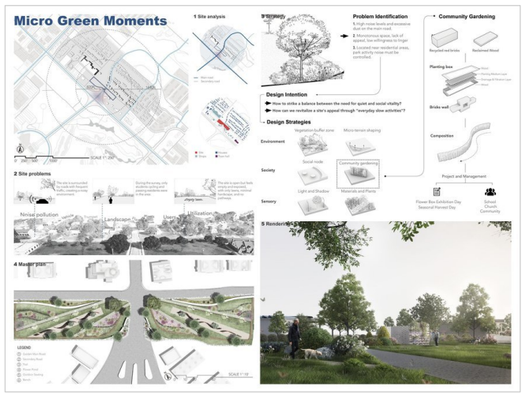

2025 · EASTGATE PARK

Second project · Sep 22 – Oct 20, 2025

The same methods, used on a 1.6-acre park near City Hall where traffic noise, empty lawns, and no seating kept people from staying.

BLA STUDIO

Campus Landscape Design, 2025–2026

SITE: DIVERSITY PLAZA, TEXAS A&M · SPRING 2025–2026

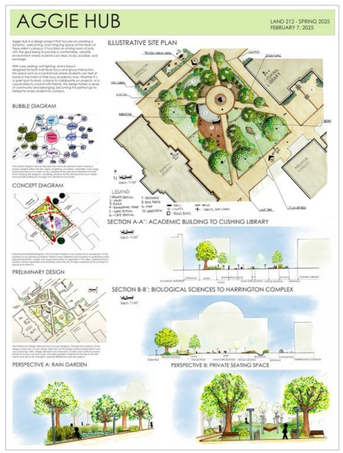

First project of the term, new focus each year

Both springs, second-year students opened the term with a campus landscape design project. The site is Diversity Plaza, behind the Academic Building at the center of campus, which reads as the back of a building. The site stayed the same; what changed was how they designed and drew it: in 2025 by hand, around one shared value, and in 2026 with a theme each, modeled and rendered in software.

2025 · ONE VALUE, DRAWN BY HAND

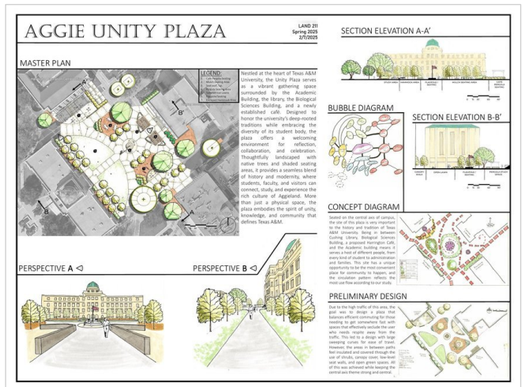

Project 1 · Posters, Feb 7, 2025

Every plaza expressed diversity: site and user analysis, a program, two concepts, then a hand-inked, colored plan, sections, perspectives, and a study model.

WHAT CHANGED FOR STUDENTS, 2025 TO 2026

Moving from hand drawing to modeling and rendering in software gave students stronger pieces for their portfolios, and more students in the 2026 cohort found summer internships after their second year.

BLA STUDIO

01 LANDSCAPE DESIGN STUDIO · UNDERGRADUATE · BLA

LAND 212 · Spring 2025–2026 · Co-instructor

Campus Landscape Design, 2025–2026

SITE: DIVERSITY PLAZA, TEXAS A&M · CONTINUED

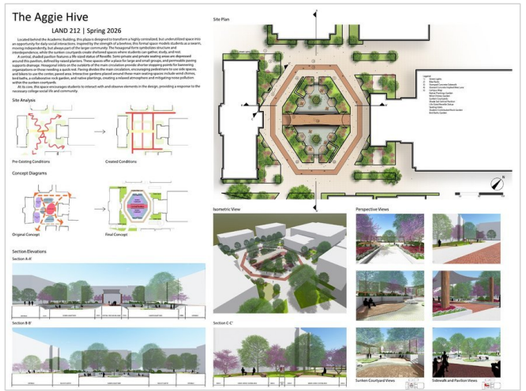

First project of the term, new focus each year

2026 · A THEME EACH, BUILT IN SOFTWARE

Project 1 · Posters, Mar 6, 2026

Each student chose a theme from the studio's list and had to show it in layout, materials, and program, from idea to concept to space; the brief put it plainly: themes are not slogans. Students were encouraged to build their plazas as 3D models and render them; hand sketches stayed in the process for early ideas.

LAND 601 · Fall 2023 · Teaching assistant

Hospital Campus Site Design

CONSTRUCTION · FALL 2023 · PROJECT 2

Individual · Final board, Nov 13, 2023

The construction project of the LAND 601 studio. Students planned a hospital campus on a hypothetical urban site of about five acres in Central Texas. Each design placed a main hospital and an emergency unit, then resolved parking, drop-off, emergency and service access, and safe pedestrian routes, with grading and low-impact stormwater features drawn in plans and sections at 1" = 30'. Healing gardens and tree buffers made the campus a restorative setting.

TECHNICAL FOCUS

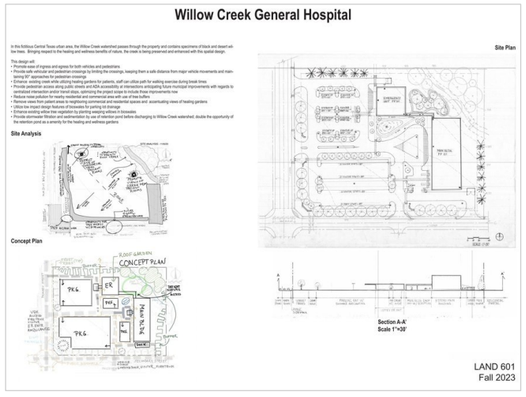

- Vehicular and pedestrian circulation
- Parking, drop-off, and emergency access
- Grading and low-impact stormwater
- Healing landscapes
- Plans and sections at 1" = 30'

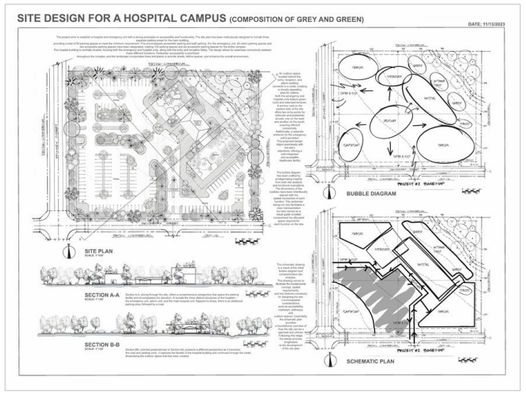

MY ROLE

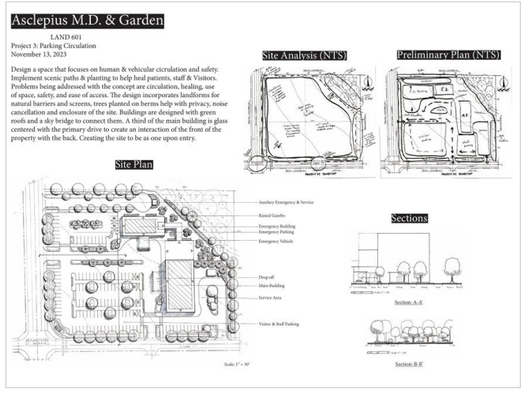

[e.g., led desk critiques on circulation and parking layout]

LEADING REAL PROJECTS FROM DESIGN TO RESEARCH · 2025–2026

Engaged Scholarship

Practice · Leadership · Research, joined in one line of work with real clients · Texas A&M

I lead real design projects from the first client meeting to funding, construction plans, and research. Each project joins three roles: practice, designing for a hospital, a child-care center, a county, and small Texas towns; leadership, guiding teams of student interns and coordinating clients and partners; and research, testing what the designs do for people's health and how communities can afford them.

Project	Client or partner	My role	Status	Pages
Park Design Toolkit 2026–2027 · AgriLife WOW-E **PIs: Dr. Jamie Rae R. Walker, Dr. Yang Song**	Small Texas towns, with Texas A&M AgriLife	Project Lead	**Reviewed with Harrison County; online launch 2027**	**30–31**
Harrison County Trail and Alto Park 2026 · AgriLife WOW-E **PIs: Dr. Jamie Rae R. Walker, Dr. Yang Song**	Harrison County and the City of Alto, with Texas A&M AgriLife	Project Lead	**Submitted to local governments; seeking funding to build**	**34**
Houston Methodist Rooftop Therapeutic Garden Summer 2025 · PCO internship	Houston Methodist, Neal Cancer Center	Assistant advisor and client coordinator	**In future construction plans; VR health study planned**	**32**
Charlotte Sharp Children's Garden Summer 2025 · PCO internship	Charlotte Sharp Children's Center, College Station	Assistant advisor and client coordinator	**Used to apply for funding; partly built, summer 2026**	**33**
Montgomery County Precinct 4 Parks Master Plan Summer 2025 · PCO internship	Montgomery County Precinct 4	Assistant advisor	**Master plan completed with Precinct 4**	**34**

PCO = Texas A&M Partnership for Community Outreach summer internships. WOW-E = Texas A&M AgriLife Working on Wellness Environments. Entries in brackets are still to be filled in.

01 PRACTICE

Design for real clients: a hospital, a child-care center, a county, and small Texas towns. The designs feed funding applications and construction plans; one is partly built.

02 LEADERSHIP

I lead teams of student interns, run twice-weekly reviews, and coordinate clients, county officials, and partners from the first meeting to the final package (pages 30–34).

03 RESEARCH

A planned VR study with Houston Methodist researchers on stress and well-being, and a park design toolkit shaped by my mobility-data research on park use (pages 30–31, 32).

WHAT STUDENTS GAIN

- Meetings, reviews, and presentations with real clients.
- Field skills: site survey, elevations, and drainage analysis.
- Cost estimates and phasing for funding applications.
- Drawings and renderings for their portfolios.
- A design that moves toward construction.

ENGAGED SCHOLARSHIP · PROJECT LEAD + RESEARCH

Park Design Toolkit

TEXAS A&M AGRILIFE · WOW-E · 2026–2027 — Two web tools for small Texas towns

THE PROGRAM
WOW-E (Working on Wellness Environments) helps Texas communities create parks, trails, and places for healthy living.

$828K	$3.3M	2028
a year from the CDC High Obesity Program	awarded to WOW-E, 2023–2026	end of the current grant period

WHO IT IS FOR
County and city staff, and residents, who have no design training.

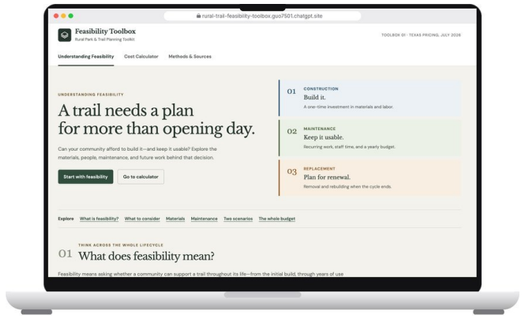

TWO QUESTIONS THEY ASK
1 What could our park look like?
2 Can we afford to build it, keep it up, and rebuild it?

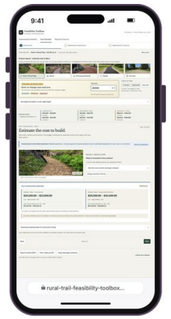

→ **01 PRICE IT** Feasibility Toolbox, this page
⇅ linked by three budget levels
02 SEE IT Visualization Toolkit, page 31

PROJECT LEAD
I lead the project: I planned both tools, built the websites, and work with Texas A&M AgriLife and Harrison County staff.

PIs
Dr. Jamie Rae R. Walker · Texas A&M AgriLife (WOW-E)
Dr. Yang Song · Landscape Architecture & Urban Planning

TOOL 01 · FEASIBILITY: PRICE THE WHOLE LIFE OF A TRAIL — Texas prices, July 2026

Start page and cost calculator
Three stages in plain words; pick a surface and area to compare crew and contractor costs.

SCAN TO TRY IT

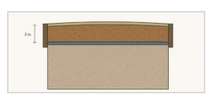

Feasibility Toolbox
The current version; public launch in 2027.

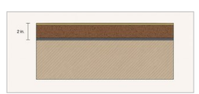

Wood chips
4 in. over fabric

Gravel
2 in. on a 4 in. base

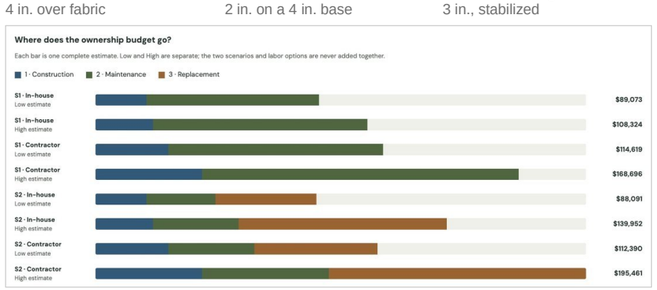

Decomposed granite
3 in., stabilized

Asphalt
2 in., sealed

Concrete
4 in., with mesh

Where the money goes · 20,000 sq ft wood-chip trail, three years
Build: $20K–$42K. Own: $88K–$195K. Upkeep and rebuilding cost more than building.

HOW THE NUMBERS ARE BUILT
- Materials: three Texas retail products per layer, averaged.
- Town crew: the Texas state salary schedule.
- Contractor: installed-cost rates for Texas ZIP codes.
- Five standard trail sections set the layer depths.
- Two plans over three years: keep it up, or maintain less and rebuild.
- Every result is a low–high range.

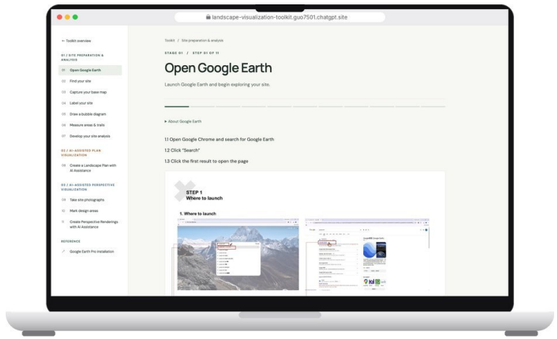

IMPACT

ENGAGED SCHOLARSHIP · PROJECT LEAD + RESEARCH

Park Design Toolkit

TEXAS A&M AGRILIFE · WOW-E · CONTINUED — PIs: Dr. Jamie Rae R. Walker · Dr. Yang Song

TOOL 02 · VISUALIZATION: EARLY VISUALS WITH AI — Free tools: Google Earth, PowerPoint, ChatGPT

Inside the toolkit · step 01 of 11
Each step gives short instructions and marked-up screenshots.

WHAT IT IS
A step-by-step guide that uses free AI tools to make early, rough visuals of a park idea. They are not final designs.

WHY IT HELPS
Residents and town staff can show what they want before they meet a design team, so the first talk starts from a shared picture.

SCAN TO TRY IT

Visualization Toolkit
The current version; public launch in 2027.

THREE STAGES, ELEVEN STEPS — Demonstration site: Alto, Texas

STAGE 01 · STEPS 1–7
Map the idea

Open Google Earth, capture and label the site, draw a bubble diagram, and measure areas and trails.
You get: a measured site diagram.

→

STAGE 02 · STEP 8
See it as a plan

Give the diagram to an AI tool with a ready-made prompt; ask for other paths or play areas.
You get: a rendered plan to compare.

→

STAGE 03 · STEPS 9–11
See it at eye level

Take a site photo, mark where changes go, and ask AI for a street view.
You get: an eye-level view.

THREE BUDGETS, ONE STREET — One photo, three prompts

Today
Unpaved street, open lot.

Low cost
Bike lane, gravel lot.

Medium cost
Sidewalk, playground.

High cost
Promenade, picnics.

PICTURE, THEN PRICE
Each budget level can be priced across its whole life in Tool 01.

← Page 30

FROM REVIEW TO LAUNCH — Public launch planned for 2027

2026 · BUILD
Both tools built, with Texas prices from July 2026.

→

REVIEW + REVISE
Harrison County staff reviewed both tools; we are revising them now.

→

NEXT · FIELD TEST
Other Texas towns try the tools first; then a new round of revisions.

→

2027 · LAUNCH
Online for local governments and residents across Texas.

The same towns are in my studios: Alto, the demonstration site, in LAND 601 (page 14), and Harrison County in LAND 212 (page 18).

IMPACT

ENGAGED SCHOLARSHIP · TEACHING + SERVICE + RESEARCH

Houston Methodist Rooftop Therapeutic Garden

STUDIO → PRACTICE → RESEARCH · 2025–2026

Summer internship · Partnership for Community Outreach

TEACHING With faculty advisor Dr. Kenneth Hurst, I advised four interns from a site study to renderings.

SERVICE I coordinated with the Neal Cancer Center team, from the 21st-floor site visit to each review.

RESEARCH With Houston Methodist researchers, we plan a VR study of how the garden affects stress.

SPRING 2025
Studio ← page 16
LAND 212 team booklets

→ MAY–JUNE 2025
Internship
Site visit, analysis, design

→ SUMMER 2025
Handoff
Plans and renderings

→ NEXT
Build + research
Construction plan; VR study

1 READ THE SITE

May 2025

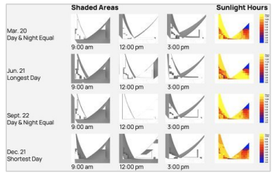

Interns walked the 21st-floor roof with the hospital team, looked out from the clinic rooms, and modeled sun and shade by season.

Site visit with the client

The garden seen from a clinic room

Sun and shade through the year

2 DESIGN

June 2025

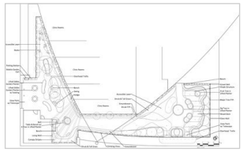

Six therapeutic principles, from sensory modulation to social interaction, shaped a garden fitted around the clinic rooms.

Entrance plaza, west side: rendered plan

Six therapeutic principles

CAD base plan

3 EXPERIENCE

Summer 2025

Renderings place each principle in the garden and show what patients see from their rooms.

Entrance: shade and lawn

Living wall corner

View from a patient room

4 BUILD AND RESEARCH

Next

The design moves toward construction and becomes the setting for a health study.

FUTURE BUILD

Houston Methodist has included the design in its future construction plans.

FROM DESIGN TO HEALTH RESEARCH

With researchers at Houston Methodist, we plan to bring the garden into virtual reality and test whether a therapeutic landscape lowers stress and supports the mental well-being of patients and their care teams.

Design: rooftop garden → **VR: patients, care teams** → **Health: stress, well-being**

Photos with students are used with their permission, which they gave before the photos were taken.

ENGAGED SCHOLARSHIP · TEACHING + SERVICE

Charlotte Sharp Children's Garden

FROM STUDIO TO CONSTRUCTION · 2025–2026

Summer internship · Partnership for Community Outreach

TEACHING I led four student interns through the design, with reviews twice a week, from a site survey to final drawings and a cost estimate.

SERVICE I coordinated between the interns and the center's director and staff, so each review answered the client's needs.

SPRING 2025
Studio ← page 17

→ SUMMER 2025
Internship
Survey, design, client reviews

→ JUL–AUG 2025
Handoff
Final design, cost estimate

→ 2026
Funding and building
Partly built in summer 2026

1 MEASURE

May 2025

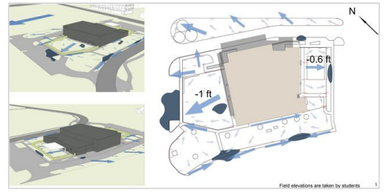

Interns surveyed the yard with an auto level and mapped where water pools, up to 1 ft low.

Survey

Recording elevations

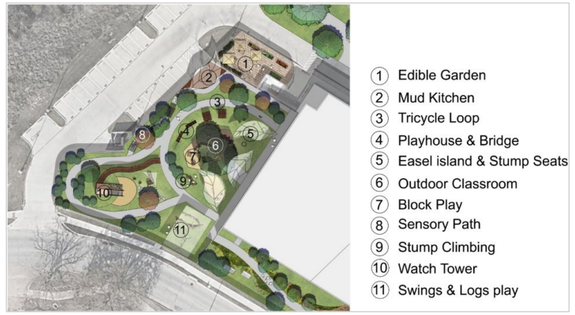

Flooding analysis

2 DESIGN

June 2025

Seven principles, from risk and challenge to ecological literacy, shaped eleven play areas for preschoolers.

Preschool master plan: eleven play areas

Seven design principles

Bird's-eye view

3 DETAIL

July 2025

Each area was modeled and rendered at a child's eye level.

Edible garden

Art and play pavilions

Music and challenge zone

4 HAND OFF AND BUILD

Jul 2025 – 2026

A final presentation and a cost estimate gave the center what it needed to seek funding.

Final presentation, Jul 31, 2025

COST ESTIMATE · AUG 2025

$215,689

Paving and surfaces $195,562; planting $20,127, across four zones. Shade structures and play equipment priced separately.

STATUS · 2026

The center is using the design to apply for funding.

Part of it was built in summer 2026, including the paths.

Photos with students are used with their permission, which they gave before the photos were taken.

IMPACT

ENGAGED SCHOLARSHIP · PROJECT LEAD + ADVISOR

Park Plans for Texas Communities

THREE COMMUNITIES · 2025–2026 — Real sites, real budgets

Beyond the toolkit, I lead park plans for real Texas communities. Each plan is written for people without design training and follows the same four steps.

1 READ THE SITE — LiDAR, inventory, survey → **2 PLAN WITH THE CLIENT** — Program set by local needs → **3 PRICE EACH ELEMENT** — Material cost by item → **4 HAND IT OFF** — Used to seek funding

01 HARRISON COUNTY PARK · TRAIL MASTER PLAN

AgriLife WOW-E · 2026 · PIs: Dr. Walker, Dr. Song

ROLE Project Lead
STATUS Submitted to the county; seeking funding to build

- Three walking loops (0.5, 1, and 2 miles) start from one trailhead.
- Surfaces match use: granite for access, then gravel, then natural soil.
- LiDAR runoff and slope maps placed low-cost drainage crossings.

$205K
Trail materials for three loops, before labor

Trail spur to the AgriLife office, rendering

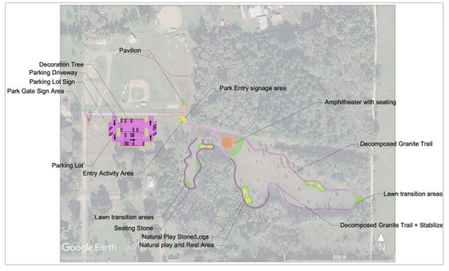

02 ALTO PARK · SITE MASTER PLAN

AgriLife WOW-E · 2026 · PIs: Dr. Walker, Dr. Song

ROLE Project Lead
STATUS Submitted to the city; seeking funding to build

- Granite trails, a 58-car gravel lot, nature play, and a shade pavilion.
- A lawn amphitheater that seats 55–80 people.
- LiDAR elevation and water-flow analysis guided the layout.

$310K
Trail and parking materials, before labor

Site master plan

03 MONTGOMERY COUNTY PRECINCT 4 · PARKS MASTER PLAN

PCO summer internship · 2025

ROLE Assistant advisor
STATUS Master plan completed with Precinct 4

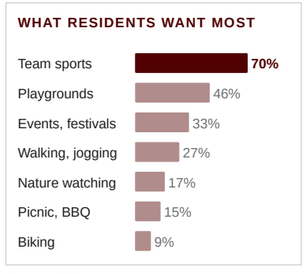

- 9 county parks in one of the fastest-growing U.S. counties.
- Amenity inventory, park standards, a survey, and concept plans.

168.9
Acres of county parks in the plan

Master plan report, with Precinct 4

WHAT RESIDENTS WANT MOST

Survey, 229 responses (pick several)

The costs on this page use the method of Tool 01 in the Park Design Toolkit (**page 30**).
