Zipeng (Cooper) Guo

Ph.D. Student in Urban & Regional Sciences
Texas A&M University
guo7501@tamu.edu
guozipeng7501@gmail.com

SHORT BIOGRAPHY

I am a Ph.D. student in the Urban and Regional Science program at Texas A&M University. I received my Master of Landscape Architecture degree from the University of Idaho (UI) in the May of 2022, and a BS in Landscape Architecture from UI in May 2020. My primary research areas of interest fall on landscape design, Geo-planning, Low impact design, site planning, and creative development.

EDUCATION

Texas A&M University, College Station, TX *Aug. 2023 to Present*
Ph.D. in Urban & Regional Sciences

University of Idaho, Moscow, ID *Jan. 2017 to May. 2020* Landscape Architecture; Bachelor of Science degree (May 2020)
Cumulative G.P.A. 3.6/4.0
Major Coursework: Built Environment; Site Design; Water Conservation Tech; Pant Materials & Design; GIS Application in Land Planning; Grading, Drainages, and Stormwater Management

University of Idaho, Moscow, ID *Jul. 2020 to May. 2022*
Landscape Architecture; Master of Landscape Architecture (MLA) (May 2022)
Cumulative G.P.A. 4.0/4.0
Major Coursework: Geodesign in urban Planning, Reginal and Community Design, Graduate Studio

HONORS AND AWARDS

NATIONAL LEVEL

2022 The Landscape Architecture Foundation (LAF) Olmsted Scholar

STATE LEVEL

2024 TEXAS ASLA Student Design Award
2022 Idaho-Montana ASLA Student Merit Award for Student Achievement

UNIVERSITY AND COLLEGE LEVEL

2026 The Jesus Hinojosa Endowed Urban Planning Scholarship, Texas A&M University
2025 TAMU GIS Day Graduate Poster 1st Place, Texas A&M University
2024 Graduate Student Small Research Grants, Texas A&M University
2024 Graduate Student Research and Presentation Travel Award
2022 The University of Idaho GPSA Travel Awards
2021 The University of Idaho Art and Architecture Scholarship
2021 University of Idaho, The Student Achievement Award, 2020-2021

TEACHING EXPERIENCE

1. **Guest Lecturer, URPN 325 — GIS in Urban Planning, Texas A&M University** *Spring 2026*

Description: Delivered a guest lecture on practical applications of GIS in landscape architecture and design. The lecture introduced several GIS-based tools and workflows relevant to site analysis, spatial assessment, and landscape planning, and presented landscape design case studies demonstrating how GIS can support design analysis and decision-making. **(17 Students)**

2. **Co-Instructor, LAND 212 — Landscape Design Studio, Texas A&M University** *Spring 2026*

Description: Undergraduate landscape architecture design studio organized around two applied design projects. The first project focused on campus landscape design, while the second involved a community-based landscape design project for Harrison County. Responsibilities included studio instruction, individual and group critiques, guidance on design development and graphic communication, and feedback on project presentations. Detailed project descriptions and student work are included in the teaching portfolio. **(39 BLA Students)**

3. **Teaching Assistant, LAND 601— Studio Class, Texas A&M University** *Fall 2025*

Description: This introductory graduate design studio introduces foundational principles of landscape architecture through an emphasis on form, space, and function. Students explore how spatial relationships are shaped by landform, vegetation, circulation, and human use, developing three-dimensional design thinking through a sequence of three projects. Project 1 focuses on the design of a central campus plaza, emphasizing spatial definition, plant-based form-making, and pedestrian experience. Project 2 advances these concepts through the design of Eastgate Park, prioritizing durable amenities, restrained formal expression, and legible circulation. Project 3 challenges students to apply form-based thinking to real-world contexts in Alto, TX or Rio Grande City, TX, addressing ecological processes, social connection, and community identity. Across all projects, students employ hand drawing, physical modeling, and schematic digital representation to communicate design intent, with a strong emphasis on visual thinking, spatial sectioning, and poster-based presentation. **(6 MLA Students)**

4. **Co-Instructor, LAND 212 LANDSCAPE DESIGN II — Studio Class, Texas A&M University.** *Spring 2025*
Description: This second studio in the landscape design sequence builds on prior coursework to shift students' focus from the form of design to the meaning of form. Emphasizing the relationship between human behavior and design decisions, students explore how physical settings influence social interaction, psychological well-being, and active living. Through

three individual and team-based design projects, students apply site-sensitive strategies combining natural systems (landform, vegetation, climate) and human-made systems (paths, structures, utilities). The course develops students' ability to observe human behavior, perform site analysis, and synthesize data into environmentally and culturally responsive design solutions. Analog and digital tools are used to communicate ideas, with an emphasis on visual thinking, sketching, and presentation graphics. **(43 Students)**

5. LAND 601 LANDSCAPE DESIGN FUNDAMENTALS -- Studio Class, Texas A&M University. *2024 Fall*
Description: This first design studio course for career-change students introduces the fundamentals of landscape architecture, focusing on form-making skills and the application of landscape materials such as landform, water, vegetation, and circulation. Through multiple short design projects, students explore basic design theories and principles with an emphasis on context-sensitive and evidence-based approaches. The course develops skills in translating abstract concepts into 3-dimensional spatial forms, using both analog and digital tools to communicate ideas clearly and effectively. **(5 Students)**

6. Co-Instructor, LAND 212 LANDSCAPE DESIGN II -- Studio Class, Texas A&M University *2024 Spring*
Description: This studio course is the second introductory course in landscape design, following LAND 211.
The focus shifts from the form of design to the meaning of form. Students will engage in three main projects: Campus Plaza design, City of Bryan Downtown Pocket Park design, and Southeast Community Park design. Students will develop the ability to apply basic site design principles, combining human factors with natural systems to create usable three-dimensional spaces that are environmentally, socially, and culturally equitable. The course also introduces tools and methods for the systematic design process, including mapping, trace measures, and observation to understand and analyze human behaviors. **(38 Students)**

***7.* Teaching Assistant, URPN 220 DIGITAL COMMUNICATION, Texas A&M University** *2023 Fall*
Description: Explores the intersection of urban planning and digital technologies. The course covers various digital tools and communication strategies for effective information dissemination and public engagement in urban planning. Students learn to utilize software for design visualization, data analysis, and create digital content that supports urban planning projects. **(19 Students)**

***8.* Co-Teaching, LAND 601 600: LAND ARCH DES THRY APP, Texas A&M University** *2023 Fall*
Description: Landscape Architecture Design Theory and Application is a course focused on the interplay between conceptual design theories and their practical application in landscape architecture. Students examine historical and contemporary design principles, applying them to real-world projects. Emphasizing sustainability, cultural relevance, and technological trends, the course fosters critical thinking and innovative design solutions for environmental challenges. **(12 Students)**

***9.* Lecturer, LARC380 Water Conservation Technologies Course, University of Idaho** *2022*
Description: Applied a set of tutorials that delivered all lecture material, images, and a series of in-class exercises to extend the understanding of the material. Each student is expected to view and learn the text and images in the tutorials before coming to the weekly class meetings. Guided the students to review the tutorials before attempting the assignments. The class meetings will be devoted largely to developing design exercises. **(8 Students)**

10.Teaching Assistant, LARC210 Landscape Architecture Representation and Media Course, UI
2021
Description: Facilitated a discussion section or tutorial; hold weekly office hours; grade homework, programming assignments, exams, or projects; keep records; distribute and copy reading materials; prepare answer keys or supplementary notes; and act as the course webmaster. **(16 Students)**

ACADEMIC & DEPARTMENTAL SERVICE

1. Lecture Series Coordinator, Department of Landscape Architecture and Urban Planning
Texas A&M University Fall 2025 - Spring 2026

Description: Coordinated the LAUP Lecture Series for the 2025–2026 academic year, featuring distinguished speakers in landscape architecture, urban planning, and sustainable design. Oversaw event logistics, communication, and promotion, strengthening departmental engagement and academic exchange.

2. Assistant Advisor, Partnership for Community Outreach (PCO) —Texas A&M University *Summer 2025*
Description: As part of the Partnership for Community Outreach (PCO) initiative in Summer 2025, graduate interns collaborated on three community-centered design projects across Texas: the Houston Methodist Hospital Neal Cancer Center Therapeutic Garden (Houston), the Charlotte Sharp Children's Center Garden (College Station), and the Montgomery County Precinct 4 Parks Master Plan. Working with faculty, local agencies, and nonprofits, students developed site-sensitive designs focused on therapeutic landscapes, child-friendly environments, and regional park

planning. Responsibilities included site analysis, concept development, stakeholder engagement, and final presentations using both analog and digital tools. **(4 MLA Students)**

3. **Guest Lecturer, URPN 325 (Introduction to GIS in Urban Planning) - Texas A&M University** *Spring 2026*

Description: Delivered a guest lecture to undergraduate planning students on the application of Geographic Information Systems in landscape architecture. The session introduced how GIS can be used as a decision-support tool for site analysis and early-stage design development. Emphasis was placed on translating spatial data into actionable insights, including evaluating topography, hydrology, land use, and accessibility to inform planning and design strategies. Students were also introduced to efficient workflows for rapid site analysis and concept generation, demonstrating how GIS can support evidence-based and time-sensitive design processes.

WORKING EXPERIENCE

1. **Landscape Design Intern** Texas A&M AgriLife — Landscape Design Feasibility Tool *Summer 2026*

   Project Managers: Jamie Rae R. Walker

   Contents: Developed a feasibility and cost-estimation toolkit for Texas communities and resource-limited planning agencies. Created cost tables, budgeting worksheets, and lifecycle planning tools for landscape elements including trails, parking, signage, vegetation, lighting, and other site improvements.

2. **Landscape Design Intern** Texas A&M AgriLife — Harrison County Trail Design Project, Harrison County, TX

   Summer 2026

   Managers: Jamie Rae R. Walker and Yang Song

   Contents: Worked with clients to develop a multi-use trail system using site and LiDAR data. Designed three trail types for different recreational functions, prepared CAD plans and parking layouts, and developed material quantities and construction cost estimates.

3. **Landscape Design Intern** Texas A&M AgriLife — Alto Landscape Design Project, Alto, TX *Summer 2026*

   Project Managers: Jamie Rae R. Walker and Yang Song

   Contents: Collaborated with clients and project managers to develop site and landscape design proposals for the City of Alto. Prepared CAD site plans, parking and circulation designs, construction cost estimates, and supporting design materials for project planning and funding applications.

4. **Landscape Design Intern** Charlotte Sharp Children's Center Project, College Station, TX *2025*
   Contents: Collaborated with faculty and university partners to design a nature-based children's garden for the Charlotte Sharp Children's Center. Responsibilities included conducting site inventory and analysis, preparing conceptual and schematic designs, producing rendered master plans, and presenting design solutions to stakeholders. The project emphasized universal accessibility, play safety standards (ASTM F1487, CPSC), ecological sustainability, and developmental enrichment for early childhood education.
5. **Therapeutic Garden Design Intern** Houston Methodist Hospital – Neal Cancer Center, Houston, TX *2025*
   Contents: Participated in the design of a rooftop therapeutic garden supporting patient healing and staff wellness. Tasks included site documentation, concept development, schematic and final design plans, and 3D visualizations. The project focused on biophilic design, sensory engagement, passive use, and compliance with best practices in sustainable healthcare design. Presented final deliverables to hospital stakeholders as part of the campus-wide wellness initiative.
6. **Landscape Planning Intern** Montgomery County Precinct 4 Parks Master Plan *2025 Summer*
   Contents: Supported the development of a parks master plan covering over 160 acres across nine parks in Montgomery County, TX. Tasks included park inventory and assessment, demographic research, analysis of recreation standards, and the creation of site-specific conceptual plans. Contributed to the final planning document that included facility programming, schematic designs, and implementation strategies to guide future investments in community recreation infrastructure.
7. **Landscape Architecture Intern** Cobblestone Landscape LLC, Moscow, ID *2021*
   Contents: Took charge of the company's all facets of Landscape Design/Build Operations in the Moscow, Idaho, and surrounding areas. Tasks included but are not limited to aiding the design team with Site Inventory and

Analysis Conceptual Design, Drafting, Modeling, Cost Estimating, as well as gaining pertinent hands-on experience assisting one of the Build Crews in their daily construction activities.
